FOR THOSE WHO WANT TO GO FASTER

## REAL-TIME AERODYNAMICS

Gibli Innovations Inc. has developed a revolutionary sensor, which will provide real-time aerodynamic feedback while riding. We welcome 30 people to try the sensor and have their position assessed using our wind tunnel verified development sensor (< 2.5% error).

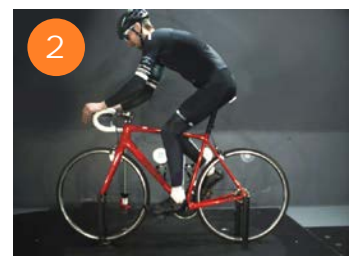

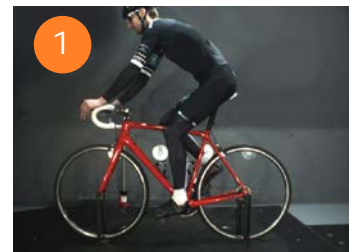

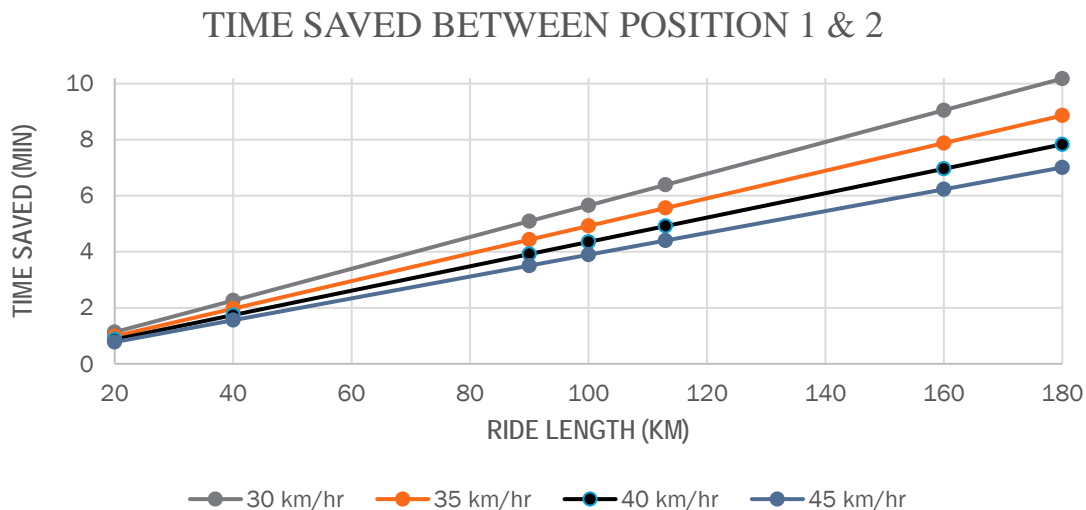

## 30 EXCLUSIVE PRE-LAUNCH TESTS

This is an opportunity to improve your time trial performance.

- Pre-ride position assessment with baseline CdA.
- Work through various position changes to gain the most aerodynamic position.
- Post-ride report and phone call to review CdA values.
- See up to 20% aero efficiency improvement.

## COST: \$100 CAD

We will be scheduling a trip to your City and will confirm the date upon confirmation of the booking. A 100% refund will be provided if the event needs to be delayed for technical reasons.
